Abstract (en)
[origin: WO2016166028A1] The invention relates to an aircraft module covering device, comprising at least one aircraft module (10, 44) and at least one panel (12, 46), which is provided for covering the aircraft module (10, 44) and, for this purpose, is firmly connected to the aircraft module (10, 44) in order to at least partially cover the aircraft module (10, 44) in a mounted state. According to the invention the panel (12, 46) is designed to be connected to the aircraft module (10, 44) by means of at least one frictional connection and, for this purpose, has at least one connection element (18, 20, 22, 24, 28), which is firmly arranged on an underside (28) of the panel (12, 46).
