Abstract (en)
[origin: WO2016166495A1] The present invention relates to a stowing and storage device (2) comprising a frame (4), at least two cylindrical holding pins (52, 54) attached to the frame (4), both holding pins (52, 54) being placed symmetrically relative to a median axis of the frame (4), at least two abutments (56, 58) attached to the frame (4) and each spaced from the median axis by the same distance, the space between one abutment (56, 58) and the median axis being less than the space between each holding pin (52, 54) and the same median axis, the abutments (56, 58) being longitudinally offset from the median axis, and fasteners attached to the frame (4).
