Abstract (en)

[origin: WO2016167742A1] A riser tree controls adapter comprises an outer riser tree controls adapter, placed outside a first tubular, and an inner riser tree controls adapter placed outside a second tubular and configured to be received into the outer riser tree controls adapter. Once inserted into the outer riser tree controls adapter, one or more control signal pathways are provided between a junction plate control connection receiver and a corresponding set of inner connection interfaces.
