Abstract (en)
[origin: WO2016166260A1] The invention relates to an inertia heating element (1) designed to be fitted to a heating appliance, characterised in that it comprises: a preferably electrical heat source (2); and a shell (3) that can be heated by the heat source (2) and defines at least one compartment (4) for receiving an inertia material (5), said shell (3) being designed to both transmit heat outside same and conduct the heat to the inertia material (5).
