Abstract (en)

[origin: WO2016165705A1] The invention relates to an actuator (1) for actuating a motor vehicle clutch, comprising a support (3) which supports at least one stator (4) and a sensor (5). The support (3) is provided with at least one recess (9) through which a signal transmission and/or power supply element (10) is guided in order to allow a signal transmission and/or a supply of power to the stator (4) and/or the sensor (5), said signal transmission and/or power supply element (10) being integrated into the support (3). The invention also relates to a hybrid module (40) comprising a clutch, such an actuator (1), and a plug (11) inserted into the actuator.
