Abstract (en)
[origin: EP3284561A1] The present invention discloses a gecko gun, which includes a housing (100) with a left handle (1) on the bottom, and a right handle (2). The mentioned left handle (1) and right handle (2) are all covered by a handle housing (3, 4). The mentioned cover housing (100) is installed with a U-shaped seat (5) at the top end. The top end of the right handle (2) is rotated with the top end of the housing (100) through a spindle (6). The top end of the right handle (2) is installed with a link mechanism (7), which is covered by the mentioned housing (100) and fixed to the housing (100) via screws. The link mechanism (7) includes a first linkage assembly (7) linked to the top end of the right handle (2) and a second linkage assembly (72) connected to the first linkage assembly (71), and the second linkage assembly (72) is used to drive the U-shaped seat (5) to shift forward and backward. Thereby the designed gecko gun will help achieve the effect of energy saving.
