Abstract (en)
[origin: CN203959038U] The utility model discloses a special type land route refrigeration container and belongs to the technical field of containers. The special type land route refrigeration container comprises a container body, a storage battery and a refrigerator unit. The refrigerator unit comprises a refrigerator with a generator and a remote controller achieving remote control over the temperature inside the container body. The storage battery and the refrigerator with the generator are arranged at the front end of the container body. The refrigerator is connected with the storage battery. A solar panel is arranged on a top plate of the container body. The solar panel is connected with the storage battery. A plastic oil box is arranged at the front end of the container body. The plastic oil box is connected with the generator of the refrigerator. A lower side beam of the container body is provided with a wall grabbing groove used for hoisting the container body. The special type land route refrigeration container is good in strength, economical, practical and easy to manufacture, achieves overland transportation refrigeration container carrying capacity, ensures the refrigeration system ultra-long running period, and meets the requirements for highway and railway combined transport.
