Abstract (en)
The present invention relates to a user interface (10) for a domestic appliance, in particular for a cooking oven. The user interface (10) comprises at least one input range (12) and at least one display range (14). The input range (12) includes at least one control element (16). The display range (14) includes at least one numeric display (28) and at least one pair of a first display bar (24) and a second display bar (26). The first display bar (24) and the second display bar (26) of one pair are arranged side-by-side and parallel to each other. The numeric display (28) indicates a current value. The first display bar (24), in particular the length of said first display bar (24), represents said current value. The second display bar (26), in particular the length of said second display bar (26), represents a range of said current value.
