Abstract (en)

[origin: WO2016169907A1] The invention relates to a container (10), in particular a vial intended for holding a cosmetic product, including a wringer (20) defining a wringing opening (21), said wringer (20) being mounted inside a portion of said container (10), referred to as the body (11) of the container (10), said container (10) also including a rod (31) which is removable relative to said body (11), said container (10) also including an intermediate part (40) slidably connected to said rod (31), between two positions, said intermediate part (40) being designed to be retained in and by the wringing opening (21), said intermediate part (40) being configured to wring said rod (31) between said two positions.
