Abstract (en)

[origin: WO2016169993A1] The invention relates to a tableting machine having a device for executing a dashboard application, wherein information stored in the tableting machine can be displayed by means of the dashboard application, wherein the dashboard application is a software product that can be operated on a device for executing the dashboard application, which is selected from a group comprising mobile and/or stationary communications devices and/or data processing devices, wherein the device for executing the dashboard application and the tableting machine comprise means for forming an information exchange connection, with which the information can be exchanged between the tableting machine and the device for executing the dashboard application. The invention also relates to a method for executing a dashboard application for monitoring and/or controlling a tableting machine.
