Abstract (en)

[origin: WO2016202575A1] The invention relates to a level crossing safety system comprising a level crossing controller (4) for controlling any safety devices (2, 3), and to a method for controlling such a level crossing safety system. In order to achieve with little effort, in particular with little cable wiring, a higher safety level, it is provided that the level crossing controller (4) can be switched on by at least one current track circuit (5) and at least one wheel sensor (6, 14).
