Abstract (en)
[origin: WO2016170253A1] The invention relates to a diving mask (10) comprising a frame (12) provided with a visor (18); a flexible skirt (40) comprising a partition (46) defining an upper chamber (50) for viewing a lower chamber (52) for breathing, the partition being arranged to rest above the nose of the user such that the mouth and nose of the user are in the lower chamber, while the eyes of the user are in the upper chamber, a breathing tube (20) having a proximal end (20a) for connecting the breathing tube to the frame, the breathing tube comprising at least one channel (21) in fluid communication with the lower chamber. The diving mask further comprises a telecommunications device (500) that is mounted at least in part on the breathing tube (20).
