Abstract (en)

[origin: EP3085641A1] The invention relates to a container (30) for transporting and/or storing a plurality of glass sheets of a maximum length substantially parallel to each other, the container (30) comprising a frame (31) having a floor (32) and fastening uprights provided with holes (40, 41). The container (30) further includes moveable supporting and/or fastening means (42, 43, 44, 45) secured to the frame (31) by moveable attachment means (46) received in the holes (40, 41) such that the location of the moveable supporting and/or fastening means (42, 43, 44, 45) can be tuned to the glass sheet dimensions. The supporting and/or fastening means (42, 43, 44, 45) may also be arranged so that they are disposed within the container (30) such that the faces of the glass sheets are disposed parallel to a main longitudinal direction of the frame (31).
