Abstract (en)

[origin: WO2017008940A1] The invention relates to an exhaust-steam casing (1) for a turbine (2), the exhaust-steam casing (1) being designed to discharge the exhaust steam of the turbine (2) in a radial direction with respect to a longitudinal axis (L) of a rotor shaft of the turbine (2) and having an upper exhaust-steam casing part (3) and at least one side exhaust-steam casing part (4). The upper exhaust-steam casing part (3) and/or the side exhaust-steam casing part (4) have a lower exhaust-steam casing part connection surface (5) for connecting the exhaust-steam casing (1) to a lower exhaust-steam casing part (6). The invention also relates to a turbine frame (14), a turbine casing (11) and an assembly system for a turbine (2).
