Abstract (en)

[origin: WO2016169985A1] The invention relates to a heating system (10), in particular a fuel cell system (12) which comprises at least one sensor (52). According to the invention, at least one test device (54) which is designed to supply the at least one sensor (52) with at least one part of at least one fluid for testing. The invention further relates to a method for operating said type of heating system.
