Abstract (en)

[origin: WO2016171865A1] A method for presenting services to a subscriber includes certain processes. The method includes collecting usage data associated with an account for the subscriber that is associated with a portable device. The method includes storing usage data in a repository. The method includes determining whether the usage data satisfies a condition. The method includes determining whether an actionable category of data exists. The method includes determining an action based on the actionable category of data and a set of rules. The method includes receiving a first message from the portable device indicating that a communication function of the portable device has terminated. The method includes sending a second message to the portable device that requests an input from the subscriber via the portable device and is based on the action. The method includes receiving a third message from the portable device that includes a response to the second message.
