Abstract (en)
[origin: CN107569191A] The invention relates to a handheld cleaning and maintaining device, which is used for floor surface and preferably used for ceramic floor or wooden floor surface. The device comprises a motor housing which accommodates at least one motor and at least one driving shaft driven by the motor. The cleaning and maintaining device comprises a roller driven by the driving shaft, and the roller is a roller brush having a roller surface. The invention is characterized in that the roller brush is set at a single side; the motor housing is provided with a support rod along the axis (A) for manually guiding, wherein the support rod is designed to rotate around the axis (A). Preferably speaking, when rotating the support rod, the rotation direction of the motor can be changed.
