Abstract (en)
The present invention relates to a corkscrew having a spiral (1) which has: a free end (11) for being introduced in a cork (7) to be removed and a connecting end (12) opposite the free end (11). The corkscrew also has a guide (2) for the spiral (1) which has: a first seating (21) for housing the connecting end (12) in a start of removal position and a second seating (22) for housing the connecting end (12) in an end of removal position.
