Abstract (en)
[origin: WO2016174347A1] The invention relates to a system (1) for a motor vehicle, said system comprising: an electrical machine (3) designed to supply torque to an internal combustion engine of the vehicle, especially for starting said internal combustion engine (4) of the vehicle; and a cooling circuit (50) for the machine arranged so as to cool said machine and/or an electronic power mechanism associated with said machine, said cooling circuit being connected to an air-conditioning device (51) of the vehicle.
