Abstract (en)
[origin: WO2016173722A1] The invention relates to a pump (1, 101) comprising a pump housing (2, 102) having an intake opening (5, 105) and a plurality of outlet openings (6, 106), comprising a pump wheel (9, 109) that is accommodated in the housing (2, 102) in a rotationally drivable manner in order to effect a fluid stream from the intake opening (5, 105) to the respective outlet opening (6, 106). Radially outside the pump wheel (9, 109) inside the housing (2, 102), an adjustable ring element (13, 113) is provided, by means of which the fluid stream through the respective outlet opening (6, 106) can be regulated.
