Abstract (en)
[origin: EP3289891A1] A smoking article includes: a tobacco portion; a filter portion; a first covering portion; a second covering portion; a plurality of openings, each of the openings including a first portion penetrating the second covering portion and a second portion penetrating the wrapper; and a rotating portion permitting the mouthpiece-side portion of the filter portion and the second covering portion to rotate relative to the tobacco-side portion of the filter portion between a first position where the first portion is shifted from the second portion and a second position where the first portion and the second portion align.
