Abstract (en)  
A glove formed of a knitted first panel conforming to at least a portion of one of a front or a back of the glove, the knitted first panel comprising four finger portions including a respective front or a back of the fingers, both sides of each of the fingers and the fingertips of each of the fingers integrally formed of a knitted material without seams, and a second panel conforming to at least a portion of the other of the front or back of the glove. The glove of the present invention is made using a flat knitting machine and the knitted first panel can comprise different yarns or knittable materials that may impart different characteristics to the glove depending upon the end use or desired appearance, e.g., abrasion resistance, durability, wind protection, texture, color and the like, without a seam.
