Abstract (en)
[origin: EP3290567A1] A home appliance having a light emitting module (10), comprising a housing assembly (100), wherein the light emitting module (10) is located on the housing assembly (100), the light emitting module (10) includes a base (2), a light source (4) and a light shield (6), the light source (4) is located between the base (2) and the light shield (6), the base (2) has a diffuse reflection area (26) that receives illumination from the light source (4), an outer part opposite to the diffuse reflection area (26) has a light transmission area (8), and a light ray emitted by the light source (4) passes through the light transmission area (8) after being reflected by the diffuse reflection area (26). By using principles of diffuse reflection and shielding, light emitted has high purity, low light intensity attenuation, and a uniform and soft color in a light emitting area.
