Abstract (en)
[origin: WO2016178038A1] The invention relates to a stuffing device for footwear which is suitable for inserting into and removing from the footwear, and which comprises a gas-tight elastic part which is inflatable by means of an inflating medium, preferably air, furthermore comprises an inlet opening which is preferably provided with a check valve for the input of the inflating medium, and in its inflated state comprises an upper part following at least partially the form of the upper of the footwear, as well as, a sole part following at least partially the form of the sole of the footwear, and, the upper part and the sole part are connected to one another in a gas-tight manner. In the stuffing device for footwear according to the invention said sole part (1) or at least a part of said sole part (1) comprises a sandwich structure wherein a stiffening part (3) made of a rigid material is placed in a fixed position between a gas-tight first layer (13) made of an elastic material and a third layer (14) made of an elastic material.
