Abstract (en)
[origin: WO2016177603A1] The present invention relates to a grinding roller (11) for a rolling mill, which grinding roller is mounted on a grinding roller shaft (12) so as to be rotatable about its longitudinal axis, wherein the grinding roller shaft (2) has an axial bore (14) in which there is arranged a cooling device (10) which has at least one pipe (16, 20) which is arranged in the bore (14), wherein a first duct (18) for guiding a coolant is formed between the pipe (16, 20) and the inner surface of the bore (14) and a second duct (24) for guiding the coolant is formed within the pipe (16, 20), wherein the at least one pipe (16, 20) is formed from a plastic.
