Abstract (en)

[origin: WO2016177681A1] The invention relates to a data carrier (1) suitable for inserting into a notebook- or book-shaped object, wherein the data carrier (1) comprises a data page (2) and a connecting element (3), and the data page (2) and the connecting element (3) are connected to one another in an overlap region (4). In the overlap region (4), a security feature (14) is formed by means of laser processing, and the information components (15) of the security feature (14) are in part developed in the data page (2) and in part in the connecting element (3). The invention further relates to the corresponding method.
