Abstract (en)
[origin: WO2016177670A1] The invention concerns a method for controlling a flushing system of a toilet, comprising a step (22) of detecting the consumption of toilet paper and a step (26) of triggering the flushing system depending on the consumption of toilet paper. The method also comprises a step (20) of detecting the presence of the user on the toilet seat, the step (26) of triggering the flushing system depending on the consumption of toilet paper being conditioned by the detection (20) of the presence of the user on the toilet seat. The invention also concerns a device for controlling a flushing system of a toilet, the device being configured to carry out the abovementioned method.
