Abstract (en)
[origin: WO2016177594A1] The invention relates to a measuring tube (1, 21) for a magnetic-inductive flow meter, comprising a carrier pipe (2, 22) and a liner (7, 27) disposed in the carrier tube (2, 22), wherein the carrier tube (2, 22) has a surface structure on its inner wall, which prevents a rotational movement of the liner (7, 27) in the measuring tube (1, 21). The invention also relates to a magnetic-inductive flow meter having such a measuring tube.
