Abstract (en)  
[origin: WO2016177631A1] The invention relates to a printed circuit board (1) for an electronic component, comprising: - an electrically-insulating substrate (1.1), - a number of electrically-conductive conductor tracks (1.2), and - at least one sensor dome (S) having a sensor head (2) and a carrier body (2.1) for receiving said sensor head (2). According to the invention, the carrier body (2.1) is designed to be integral to the substrate (1.1). The invention also relates to a method for producing such a printed circuit board (1).
