Abstract (en)

The invention concerns a method for producing a structured object (1) from a half-finished product (2) of a light metal or light metal alloy by forming the half-finished product (2) with an at least partly liquid medium (3), wherein the liquid medium (3) is brought into contact with the half-finished product (2) below a temperature of 0°C of the liquid medium (3) and wherein the liquid medium (3) is set under pressure in order to form the structured object (1) from the half-finished product (2).
