Abstract (en)

A hook with a latch and trigger mechanism assembly [10]. The assembly [10] includes a hook having a body [12] and an open saddle [14]. A latch [16] is pivotable between a closed position and an open position. A finger handle [20] extends from the body [12]. A finger trigger [22] entirely within a space between the finger handle [20] and the body [12] is movable between a closed rest position and a retracted position permitting movement of the latch [16] to the open position.
