Abstract (en)

[origin: EP3293295A1] A measurement system for a machine that processes a continuous strand like textile material, wherein the machine is a spinning machine comprising a plurality of spinning positions, comprises: a plurality of quality measurement units (21) each configured to continuously measure at least one quality parameter (19) of at least one strand of the strand like textile material being continuously transported within the spinning machine. In an embodiment, each of the plurality of spinning positions is associated with an individual quality measurement unit (21).
