Abstract (en)

The invention provides a lighting device (1) comprising a light source (2), a heat sink (3) and a heat dissipation element (4). The heat sink (3) being in thermal contact with the light source (2), and the heat dissipation element (4) comprising a plurality of wire loops (41) made of a solid wire, at least one of the wire loops (41) comprising at least one attachment point (42), the at least one attachment point (42) being attached to the heat sink (3).
