Abstract (en)

[origin: WO2016181045A1] The invention relates to a protection device (30) comprising a first protection means (32) suitable for receiving a screw tool (50), and a cowl (31) that can cooperate with a housing (40) of a computer of a power train of a motor vehicle in order to hermetically close said housing (40). The first protection means (32) and the cowl (31) form a single component.
