Abstract (en)

[origin: WO2016184658A1] The invention relates to a book block for a book-like document (11) with a number of data pages (18) lying one on top of the other, which are connected to one another, and with a carrier (25), which extends at least in certain portions along a folding edge (34) and on both sides of the folding edge (34) and extends at least in certain portions in a direction transverse to the folding edge (34) along the data page (18), which carrier is arranged on a rear side of an outermost data page (18), wherein the carrier (25) consists of at least one sheet of plastic (31, 32) of a thermoplastic polymer and, after a heat treatment of the carrier (25), in which heat above the glass transition temperature of the thermoplastic polymer of the carrier (25) is supplied, the carrier (25) is cooled down in the folded arrangement (29) to a temperature below the glass transition temperature.
