Abstract (en)

[origin: WO2016182432A1] The present invention relates to a conditioning device for conditioning a fluid mixture in a throughflow system and/or measuring system, such as in a milking plant for milking mammals, the device comprising: - a conditioning chamber, - an inlet for feeding the fluid mixture into the conditioning chamber, - an outlet for discharging the fluid mixture from the conditioning chamber, - at least one conditioning chamber wall for providing a conditioning action to the conditioning device. The present invention also relates to a mass flow measuring device comprising such a conditioning device and to a method for conditioning.
