Abstract (en)

[origin: WO2016182450A1] Module-based device (10) for a firearm for sound direction and recoil dampening, which device (10) is arranged for detachable fastening to a barrel (100) of the firearm, which device (10) includes at least one sound directing and recoil dampening module (20) formed by a fastening device (21) for fastening the module-based device (20) to the barrel (100) of the firearm and provided with means (24, 25, 26, 27a-b, 300) for directing/leading sound forward and away from a shooter and bystanders, and reduction for recoil and muzzle flash. The sound directing and recoil dampening module (20) is further adapted for arrangement of at least one sound dampening module (30).
