Abstract (en)

[origin: WO2016180531A1] The invention relates to a method for checking an identity of a person, comprising the following steps: a) displaying an optically readable code (14) by means of a mobile device (10); b) reading in the optically readable code (14) by means of an optical reading device (20); c) extracting the data contained in the optically readable code (14); d) verifying the data contained in the optically readable code (14); and e) displaying at least part of the data on the optical reading device (20). Steps c) to e) are performed by means of the optical reading device (20).
