Abstract (en)
[origin: CN107822199A] The invention relates to in particular a method for producing rod-shaped articles of the tobacco-processing industry, in particular filter cigarettes or alternative smoking products, wherein rod-shaped articles are conveyed transaxially by means of conveying devices (126,128,123,124), in particular conveyor drums, of a drum arrangement. Double-length rod-shaped articles are provided with a first perforation pattern by means of a first perforation device (223); in a further step the rod-shaped articles of double length are provided with a second perforation pattern by means of a second perforation device (224) and in a subsequent step the rod-shaped articles of double length are cut into rod-shaped articles of simple length and then the rod-shaped articles of simple length are provided with a third perforation pattern by means of a third perforating device (236).
