Abstract (en)  
[origin: US2018071757A1] The invention relates to a device for rotating a fluid inside a spray nozzle, this device comprising a body defining at least one helical slot and/or a helical hole for the passage of all or part of the fluid. This device can be secured to a spray nozzle or a needle valve closing the spray nozzle. The invention also relates to an applicable device comprising such a device.

Abstract (fr)  
L'invention concerne un dispositif (30) de mise en rotation d'un fluide à l'intérieur d'une buse (2), ce dispositif comprenant un corps délimitant au moins une rainure hélicoïdale (34) et/ou un trou hélicoïdal pour le passage de tout ou partie du fluide. Ce dispositif peut être solidaire d'une buse (2) ou d'un pointeau de fermeture de la buse. L'invention concerne également un dispositif d'application comprenant un tel dispositif.
