Abstract (en)

The present invention pertains to a profiled belt provided with a belt main body, a profile provided on the back surface of the belt main body, and a fixing member that fixes the profile to the belt main body in a detachable/reattachable manner. The belt main body has a projection on the back surface, and the profile has a recessed section in which the projection fits. The fixing member fixes the profile to the belt main body in a state where the projection is fitted in the recessed section. The fixing member is inserted in the profile and the projection in an insertable/removable manner.
