Abstract (en)
[origin: EP3296482A1] An attachment assembly for an outside wall cladding element to an outside wall, wherein the outside wall cladding element, on at least one of its edges, ha a support profile arranged on the inner side thereof and a clamping strip arranged on the outer side thereof, wherein a fastening pin, such as a screw with a screw head and a threaded shank, engages the clamping strip and the support profile in order to clamp the outside wall cladding element between the clamping strip and the support profile, wherein the screw head is screwed against the clamping strip from the outer side, in such a way that the shank grips into the support profile.
