Abstract (en)
[origin: WO2016184448A1] The invention relates to a method, a device, a binder system (400) and a material system for producing components (103) using layering technology, wherein the temperature in the building space and/or in the applied material is set to at least 70 °C and maintained for at least 2 hours, and wherein the areas, on which binder (400) has been selectively applied, solidify and form the component (103).
