Abstract (en)
[origin: WO2016188628A1] Disclosed is a banknote processing machine in which banknotes (100) are directed through two components (41, 42) of an inspection device (40) by means of a belt conveyor (2). The conveyor belt is at least partially guided away from the inspection device by means of guide rollers in order to allow a better inspection of the banknotes and a trouble-free transport of the banknotes.
