Abstract (en)

[origin: WO2016188882A1] The invention concerns a collecting plate (10), having an inner face (12) and an outer face (14), for a heat exchanger, and comprising at least three collars (16, 16a) arranged in a row in order to each receive a tube (18). The two end collars (16a) of the row of collars project from the inner face (12) of the collecting plate (10), while at least one of the other collars (16) projects from the outer face (14) of the collecting plate (10).
