Abstract (en)

[origin: WO2016184673A1] The invention relates to a contact sleeve (200) having a cavity (HR) for receiving a plug pin in a plugging device. In a preferred embodiment, the contact sleeve (200) has contact fingers (201), which extend in parallel around the cavity (HR) and bear recesses (202) on the inside of said contact fingers. The recesses (202) can complement each other in order to form a circumferential groove, in particular, and can be sharp-edged.
