Abstract (en)  
[origin: EP3299306A1] A bottom portion (6) of an aseptic filling bottle (1) includes a ground contact portion (10) that comes into contact with a mounting surface, a center portion (12) that progressively intrudes interior of the bottle as it extends radially inwards from the ground contact portion (10), and a dome portion (13) that is provided at a center of the center portion (12) to intrude the interior of the bottle further than the center portion (12). A dome portion side circumferential edge (12a) of the center portion (12) has an intrusion height (D1) into the bottle interior, which height is higher than a half (D2) the height from the ground contact portion (10) to a boundary between the body portion and the bottom portion (6).
