Abstract (en)  
[origin: US2018087737A1] Light-emitting module, notably motor vehicle lighting and/or signaling module, including at least two sub-modules each including at least two light sources activatable selectively to each produce a segment of a partial light beam. Also included is a projection optic common to the two sub-modules for projecting said light-emitting segments. The sub-modules and the projection optic being adapted to produce a homogeneous segmented beam.

Abstract (fr)  
Module lumineux (1), notamment d'éclairage et/ou de signalisation pour véhicule automobile, comportant : - au moins deux sous-modules (2) comportant chacun au moins deux sources lumineuses (3) activables sélectivement pour réaliser chacune un segment d'un faisceau lumineux partiel (5), et - une optique de projection (4) commune aux deux sous-modules (2) pour projeter lesdits segments lumineux, les sous-modules (2) et l'optique de projection (4) étant agencés pour réaliser un faisceau segmenté homogène.
