Abstract (en)

[origin: US2018087733A1] According to the invention, the optical element comprises means for positioning said optical element in a predefined position on the support and elastic attachment means for attaching said optical element in the predefined position on the support.

Abstract (fr)

Un module lumineux (1) comporte au moins une source lumineuse (2), un support (3) de la source lumineuse (2), et un élément optique (4) apte à recevoir des rayons émis par la source lumineuse (2). Selon l'invention, l'élément optique (4) comporte des moyens de positionnement (463) de cet élément optique (4) sur le support (3) dans une position prédéterminée et des moyens de fixation élastiques (46) de cet élément optique (4) sur le support (3) dans la position prédéterminée.
