Abstract (en)  
The present invention relates to a domestic appliance (10), in particular a cooking hob (10). The domestic appliance (10) comprises at least reception device (16) configured for receiving a plug-in module (22) into the interior of said reception device (16). The reception device (16) includes a recess (22) configured to be penetrated by the plug-in module (22) during inserting said plug-in module (22) into the reception device (16). The reception device (16) includes connecting means (30) arranged in the interior of the casing (14). The reception device (16) is configured for connecting the plug-in module (22) to a control unit of the domestic appliance (10).
